

Central Myanmar Suffered the Worst

ISP Mapping Number 90

ISP Mapping

The “March 28 Sagaing Earthquake” of 2025 brought unprecedented devastation to central Myanmar. This central lowland region, under the control of the State Administration Council (SAC), experienced significantly more damages than those controlled by ethnic armed organizations (EAOs) and resistance forces.

As of March 31, 2025, data are based on ISP-Myanmar's research and may vary from other sources due to methodological differences and data availability. (*) The intensity data, analyzed using vector data layers, is primarily sourced from the US Geological Survey (USGS) and detailed by The Guardian.
